EDUCATION

University of Michigan, Ann Arbor, MI **Graduation Date (May 2029)**
College of Engineering | Mechanical Engineering GPA: 3.63

- Michigan Research and Discovery Scholars (MRADS)
- Dean's List and University Honors (Winter 2026)
- Relevant Coursework: Math 216: Differential Equations, Physics 240, MechEng211: Solid Mechanics, MechEng250, and ALA 104: Introduction to Research

Riverdale High School, Portland, OR **Graduation Date (June 2025)**

- In dual enrollment with Portland State University and Portland Community College GPA: 3.9/4.0

RELATED EXPERIENCE

Oldham Lab **Feb. 2026 - Apr.2026**
Research Assistant University of Michigan, Ann Arbor, MI

- Tested SU-8 electrothermal microrobot actuators under dehydrated and humid conditions for the UROP project "Assembly and Testing of Flexible Microrobot Appendages"
- Built a MATLAB object-tracking program with manual correction to measure actuator motion from stereoscope and high-speed camera video
- Presented a research poster at the 2026 MRADS Research Symposium

ENGR 100: Underwater ROV Design Project **Jan. 2026 - Apr. 2026**
Project Team Member University of Michigan, Ann Arbor, MI

- Designed, built, and tested a remotely operated underwater vehicle (ROV) with a team of 5 students
- Functioned under a model company and client and had to report to them periodically
- Developed an ROV simulation program for the team and presented the final design to the client

Z Lab **Sept. 2025 - Jan. 2026**
Research Assistant University of Michigan, Ann Arbor, MI

- Worked on a large-scale robotics project with a team of more than 25 people
- Served as a research assistant through UROP
- Utilized CAD (Fusion), 3d printing, c++, computer vision, and electrical design on robots

Exploratory Ventures Class (Swarm 2) **Apr. 2023 - Jun. 2025**
Student Teacher Portland, OR

- Taught an accredited class on the design, building, and testing of a drone swarm
- Students learned various coding languages, CAD techniques, collaboration and problem-solving skills
- Drones were designed and built from the ground up utilizing microcontrollers and the INAV software
- Communicated with FAA officials to obtain waivers for regulated drone swarm testing

LEADERSHIP & ACTIVITIES

Michigan Baja Racing **Fall 2026 - Present**
Team Member, Suspension

- Rebuild and worked on the design process CVT transmission systems for numerous vehicles

Michigan Aeronautical Science Association (MASA) **Sept. 2025 - April 2026**
CAD Team Member

- Modeled several key components in NX and Fusion360 for the landing pad subsystem
